

FDA EARLY YEARS PRACTICE AND BA (HONS) EARLY LEARNING (PROGRESSION ROUTE)

Student testimonial

"I spent a long time researching different courses and spoke to many universities, but this course offered the flexibility and support that I needed.

I work full-time and have two teenage children, so traditional university study was not an option for me. I have longed to become a teacher for over 15 years and this course is allowing my dream to become a reality." – **Lisa**

This employment-based course is designed for those working with young children (aged 0-12), such as Teaching Assistants or Higher Level Teaching Assistants in Primary Schools. It is taught solely online, allowing you to study alongside full-time employment. Upon completion of the Foundation Degree, you can progress to a top-up year to obtain a BA (Hons) Early Learning.
